

INSULATED FOAM CORE STEEL DOORS

raised panel | white

horizontal 130mm | white

Foam core steel sectional doors are filled with a polyurethane hi-density foam to provide superior strength, insulation against heat and cold and better noise reduction.

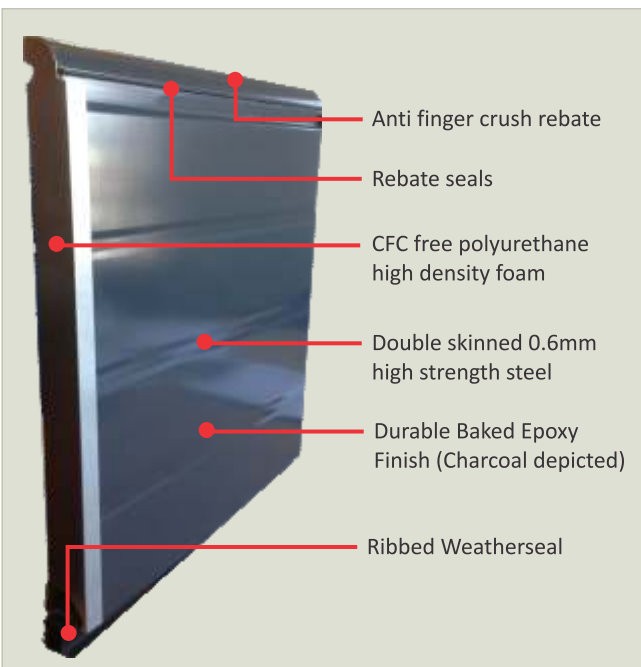

The exterior steel sheeting is available in both woodgrain embossed as well as smooth.

The steel is coated with a primer and baked enamel and can be further spray-coated any other colour.

These doors are extremely durable and require minimal maintenance. Optional vision windows in various designs can be fitted to suit your design choice.

horizontal 260mm | dark oak woodlook

Our range includes the following finishes:

- **White Woodgrain** - Raised Panel & Horizontal Woodgrain
- **Dark Oak WoodCote Woodgrain** - Horizontal 130mm & 260mm
- **Dark Dolphin Smooth** - Horizontal 130mm

These doors can also be spray-painted in a special colour of your choice.
